

## **LLAIC's Policy for COVID-19 and Other Infectious Diseases**

Please do not come to class if you are sneezing, coughing, feeling feverish, or have any other symptoms. In other words, **if you are sick, stay home!**

If you begin having symptoms within 24 hours of attending a class, and subsequently test positive to COVID-19, please notify both Bill Miniscalco at 978-443-4760 and your course leader so that we can notify your classmates. We will of course keep your identity private.

If you do test positive for COVID-19, do not return to class until you have tested negative for two consecutive days, and please continue wearing an N95, a KN95, or a KF94 mask for at least 10 days after your initial positive test.

If you have any upper respiratory symptoms, you may not actually have COVID-19 but you still could infect others. So please stay home until you are symptom free.

We are a high-risk group and need to protect each other.
